

GARIMA BISHT

DATA · AI · DEVELOPMENT

[Email](#) · [Phone](#) · Delhi, India · [linkedin](#) · [github](#)

PROFILE

BCA student building at the intersection of data, artificial intelligence, and software development. Hands-on experience in data analysis, preprocessing, exploratory analysis, machine-learning fundamentals, and AI-powered applications.

EDUCATION

Bachelor of Computer Applications (BCA) · IITM College of Engineering · 2024–2027 · CGPA 7.5/10

EXPERIENCE

Data Science Intern · Internship Studio (iStudio) | Nov 2025 – May 2026

- Performed data analysis and preprocessing using Python, Pandas, and NumPy.
- Conducted exploratory data analysis to identify trends and patterns.
- Built and evaluated basic machine-learning models and created visualizations with Matplotlib and Seaborn.
- Used Jupyter Notebook for structured, data-driven problem solving.

SELECTED PROJECTS

Aeris — Conversational Weather Platform

- Built a conversational weather application combining real-time weather data with AI-powered natural-language queries, location-aware advisories, multilingual interaction, and a specialized Farmer Mode experience.

Tech: Python · FastAPI · AI · Weather APIs · Flutter

Sukoonly — AI Wellness Companion

- Developed a 36-hour hackathon project that turns everyday habit and mood inputs into a burnout-risk score, explanations, recovery guidance, micro-tasks, nudges, and voice-first interaction.

Tech: HTML · CSS · JavaScript · Firebase · Node.js · AI

CrowdTrack — Real-Time Crowd Intelligence

- Created a 36-hour hackathon prototype using simulated WiFi/IR sensor data and camera input for density monitoring, heatmaps, threshold alerts, emergency simulations, and crowd-flow decisions.

Tech: IoT · Data Visualization · Simulation · Alerts

TECHNICAL SKILLS

Languages: Python, SQL, C, C++, Java

Data: Pandas, NumPy, Excel, EDA, Matplotlib, Seaborn

AI / ML: Machine Learning Fundamentals, Generative AI, Prompt Engineering

Development: HTML, CSS, JavaScript, Firebase, Node.js, FastAPI, Flutter

Tools: Git, GitHub, Jupyter Notebook, VS Code

ADDITIONAL

Hackathons: Smart India Hackathon 2026 · 36-hour hackathons at JSS University and IITM Janakpuri
